InkJet Green-Flex™

InkJet Media

World Class Substrates for Digital Printing

InkJet International is a proven manufacturer of super-wide format digital print solutions serving the diverse needs of agencies, media companies, and corporate brands. Since 1995, clients have depended on us for quality printing, materials, and customer care. In fact, Inkjet Media is used by most of the largest out-of-home media companies.

One of the key competitive features of Inkjet is our commitment to quality substrates on which we print your ideas. Besides our leading technology printers, we are dedicated to providing a range of media options for our customers that satisfy multiple applications and branding environments. Our international and domestic sourcing assures our customers competitive pricing with world-class quality. And today, more than ever, we also commit to provide as environmentally friendly substrates as possible.

Green-Flex™

Many brand owners and out-of-home companies are continually seeking ways to honor the environment while communicating their message. InkJet agrees with this commitment, and has been researching and co-developing a higher standard material. Introducing Green-Flex™, our private brand material designed to provide multiple benefits for out-of-home applications, and includes superior environmental friendly features. Printed on our new HP XP5300 UV-ink printers at 300-DPI, Green-Flex™ provides vibrant, beautiful prints with a clear value proposition in the areas of packing, shipping, and installation. Lightweight, yet strong, Green-Flex™ represents a paradigm shift in media substrates for discerning clients.

Who is the “greenest” of them all?

At InkJet, we respect and honor the need to be an environmentally friendly provider of digital print solutions. We believe this is a continuous journey, and not a destination. Together with our vendor and customer partners, we seek to learn, understand, and ultimately deliver to market an enhanced value proposition for environmentally friendly printing.

Features	Benefits
Printed on HP XP5300 with UV Inks at 300 dpi	UV-curable pigmented inks provide vibrant colors 300 dpi resolution assures crisp definition and colors
